

§ § §

REMARKS

Applicant has amended the claims in a manner that Applicant believes places claims 2-14 in condition for allowance. The Examiner objected to claims 2 and 7 and allowed claims 11-13. Applicant has broadened these claims slightly by removing the interrelationship of the locking mechanism to the handle and driver and has made the remaining claims dependent on believed-allowable claims. Applicant asserts that the prior art permits this broadening and that no further search is required, given that this broadening does not expand the scope of the search required to determine the patentability of the claims presented, in light of the Examiner's statement of reasons for the indication of allowable subject matter. Acknowledgment of this fact by the issuance of a notice of allowance on all pending claims is respectfully requested.
